

BAYOU TOWN Musical Puppet Theatre

PERFORMANCE REQUIREMENTS

The BAYOU TOWN Musical Puppet Theatre provides its own stage and sound equipment turning any room into a theater!

To host the BAYOU TOWN Puppet performance **you will need:**

- A climate-controlled (**air conditioned**) performance area or room large enough for students attending. (This could be a library, cafeteria, or conference room.)
- A **8' deep x 8' wide** performance staging area for puppet stage with power outlet in close proximity. (This can be raised or on the floor.)
- A **host or hostess to remain with performers** throughout their visit. (This is necessary!)
- One hour of set up time is needed to assemble the puppet theater and check sound, etc.
- Close parking to the performance area for loading and unloading.
- Please do not use any strong chemicals (including exhaust fumes from blowers)** in the performance room at least 2 hours prior to the performance. We will not be able to set up or perform under such conditions.

Please contact us with any concerns about the performance area.
We want to help make your event a success!
